

Report

Organized By: Mundeshwari College for Teacher Education

Date: 22/11/2024

Participants: Students and Faculty Members

As part of the Navami Gange Project, a cleanliness drive was conducted by the students of our college to contribute to the noble cause of conserving the environment and ensuring a clean and healthy ecosystem. The event aimed to raise awareness about the importance of cleanliness, especially concerning the preservation of water bodies and surrounding areas.

The objective of the drive was to clean the banks of the River Ganga and surrounding areas to support the Swachh Bharat Abhiyan and promote the sustainability goals of the Navami Gange Project. The NSS co-ordinator identified the most polluted areas near the Marine Drive as riverbank. Equipped with gloves, masks, and cleaning tools, the students cleaned the area thoroughly. Collected waste was segregated into biodegradable and non-biodegradable categories to facilitate proper disposal. Posters, banners, and slogans were used to engage local residents and spread awareness about maintaining cleanliness and protecting water bodies. The drive received positive feedback from the local community and authorities. Many students expressed a desire to organize such initiatives regularly. Plans are underway to conduct similar drives in other polluted areas and involve more community members.

The cleanliness drive under the Navami Gange Project was a resounding success, reflecting the collective commitment of the students and faculty to a cleaner, greener, and more sustainable environment. It was a step toward realizing the vision of a clean India and reinforcing the need for individual and community action in preserving natural resources.
